

SAVVYDFIR-MCP Investigation Report

HACKATHON-2026-WKSTN01 · Generated 2026-05-25T01:35:44.666030+00:00

Executive Summary

Investigation **HACKATHON-2026-WKSTN01** reached triage status **COMPLETE_WITH_GAPS** with **3** structurally confirmed finding(s), 3 of which are corroborated by multiple independent artifact sources, and **69** active lead(s) pending validation.

Confirmed activity (full detail in Top Confirmed Findings below):

- F-068 (conf 0.99) [TA0010/T1041]: Seven independent artifact sources confirm F-Response Subject Agent (subject_srv.exe) was deployed by an attacker from BASE-HUNT (172.16.5.25) to acquire...
- F-070 (conf 0.95) [TA0008/T1021.002]: Three independent sources confirm attacker-controlled host BASE-HUNT (172.16.5.25) laterally accessed base-wkstn-01 using compromised domain credential...
- F-069 (conf 0.78) [TA0005/T1070.006]: Four independent artifact sources confirm the attacker timestamped subject_srv.exe to 2018-04-10 19:29:48 UTC at time of deployment (2021-09-16 03:01:57...

Cross-artifact synthesis: Phase 6 synthesis complete: compare_disk_and_memory confirmed 8 cross-artifact discrepancies (Mnemosyne deletion, SRUM exfiltration, ShimCache/Amcache gap);...

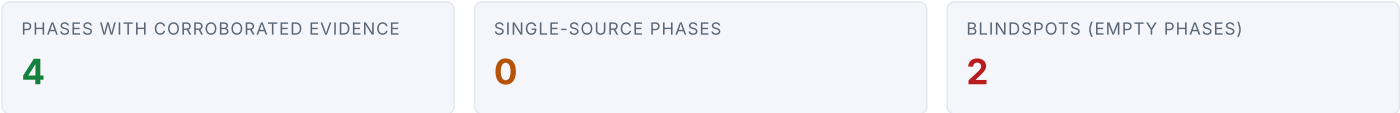

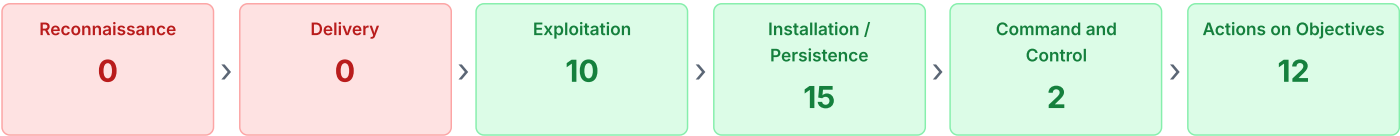

Kill-chain coverage: 4 of 6 phases evidenced, 2 blindspot(s).

Caveats: 3 unresolved cross-artifact discrepancy(ies); 0 critical / 2 high Sigma anomalies.

CASE STATUS COMPLETE	TRIAGE COMPLETE_WITH_GAPS	FINDINGS 72	CONFIRMED 3	ACTIVE LEADS 69
CORRECTION EVENTS 0	UNRESOLVED 3	SIGMA HITS 2	ATT&CK COVERAGE 42.9%	

Activity Thread - Cyber Kill Chain Coverage

Per Diamond Model Axiom 4, every malicious activity traverses a succession of kill-chain phases. Empty phases below represent **blindspots**: areas where evidence was either not extracted, not retained, or actively destroyed by anti-forensics. Phase color reflects the number of findings mapped to that phase.

KILL-CHAIN PHASE	STATUS
Reconnaissance	BLINDSPOT - no evidence
Delivery	BLINDSPOT - no evidence
Exploitation	10 findings
Installation / Persistence	15 findings
Command and Control	2 findings
Actions on Objectives	12 findings

ATT&CK Coverage

Tactic-level coverage (covered / gap) is authoritative. Technique and finding columns are inferred from the findings mapped to each tactic.

TACTIC	STATUS	TECHNIQUES OBSERVED	FINDINGS	SUGGESTED NEXT TOOLS
TA0002 Execution	covered	-	-	
TA0003 Persistence	covered	T1543.003	F-027, F-028, F-029, F-030, F-031, F-032, F-033, F-034, F-035

TA0043 Reconnaissance	gap	-	-	disk.summarize_evtx, memory.scan_network, timeline.query_timeline

Key Event Timeline

No structured event timestamps were captured in the report payload. Findings carry descriptive timestamps in their evidence text, but no normalized timestamp_observed field is present, so a chronological timeline is omitted rather than inferred from record-creation time.

Top Confirmed Findings

F-068 CONFIRMED conf 0.99 (high) TA0010 / T1041

Seven independent artifact sources confirm F-Response Subject Agent (subject_srv.exe) was deployed by an attacker from BASE-HUNT (172.16.5.25) to acquire the full disk image of base-wkstn-01 via raw kernel-level access, exfiltrating approximately 1.55 GB at 2021-09-16 03:07...

Corroborated by F-004, F-005, F-014, F-020, F-036, F-045, F-066

172.16.5.25 (BASE-HUNT – attacker controller) 172.16.7.11 (base-wkstn-01 – victim) subject_srv.exe C:\windows\subject_srv.exe
Mnemosyne.sys C:\windows\Mnemosyne.sys PID 214656 subject_srv.ex shieldbase\cbarton-a

F-070 CONFIRMED conf 0.95 (high) TA0008 / T1021.002

Three independent sources confirm attacker-controlled host BASE-HUNT (172.16.5.25) laterally accessed base-wkstn-01 using compromised domain credential shieldbase\cbarton-a via NTLM network logon, then immediately deployed F-Response as a service to perform the disk...

Corroborated by F-015, F-004, F-014

172.16.5.25 BASE-HUNT (attacker controller) shieldbase\cbarton-a (compromised account)

Anti-Forensics Warnings

- **sdelete_cipher_trace:** Execution evidence indicates SDelete or cipher /w wiping activity.

Data Gaps

- **warning:** {"gap": "sigma_hunt found no EID 1102 (log clearing) in Security.evtx \u2014 VSS analysis not triggered. If the attacker cleared logs in a prior session (before the Sep 16 attack), evidence would be absent from the current Security.evtx file.", "severity": "low"}

Sigma Anomaly Summary

#	Severity	Detector	Description	ATT&CK
1	HIGH	sdelete_cipher_trace	Execution evidence indicates SDelete or cipher /w wiping activity.	T1070
2	HIGH	sdelete_cipher_trace	Execution evidence indicates SDelete or cipher /w wiping activity.	T1070

Recorded Hunting Hypotheses

Each hypothesis formed during the hunt and its verdict after testing against the evidence: proven (CONFIRMED), disproven (REFUTED), or inconclusive (SUSPENDED). "Linked finding IDs" are the F-NNN that proved, refuted, or materially informed the verdict.

HYPOTHESIS ID	ATTACK CLASS	VERDICT	LINKED FINDING IDS	MITRE
No hunting hypotheses recorded (triage-only case).				

Analysis Lanes

LANE	STATUS	REQUIRED	AGENTS	EXECUTIONS	FINDINGS	SUMMARY
evidence_access	COMPLETE	yes	main-agent	0	0	mount_image: SleuthKit direct access ready at /mnt/evidence/ewf1; load_memory: Memory dump ready at /evidence/memory/base-wkstn-01-mem.img
memory	COMPLETE_WITH_GAPS	yes	main-agent	6	10	Memory analysis identified rogue service subject_srv.exe (PID 214656) at C:\windows\ with active C2 connection to 172.16.5.25:54420, DKOM-hidden conhost (PID 214668) with...
disk_execution_persistence	COMPLETE_WITH_GAPS	yes	main-agent	7	45	Disk execution persistence analysis complete: Prefetch confirms subject_srv.exe executed twice on 2021-09-16 (02:52:10 and 03:01:58 UTC) with Mnemosyne.sys and \$MFT references...
event_auth	COMPLETE_WITH_GAPS	yes	main-agent	5	9	Security.evtx (2021-09-15 to 2021-09-17) confirms: attacker BASE-HUNT (172.16.5.25) used cbarton-a NTLM Type 3 logons starting 02:51:50 UTC on 2021-09-16, then installed...
anti_forensics_recovery	COMPLETE_WITH_GAPS	yes	main-agent	5	8	Anti-forensics and VSS recovery complete: 4 confirmed techniques (T1070.006 timestomping, T1014 BYOVD ephemeral driver, T1014 DKOM process hiding, Amcache gap); VSS analysis...
timeline_correlation	COMPLETE_WITH_GAPS	yes	main-agent	8	21	Timeline correlation complete: USN Journal confirms Mnemosyne.sys + subject_srv.exe drop/timestomp sequence at 2021-09-16 02:52-03:02 UTC; EVTX EID 7045×3 + 4624 NTLM burst...
synthesis_corroboration	COMPLETE	yes	main-agent	2	3	Phase 6 synthesis complete: compare_disk_and_memory confirmed 8 cross-artifact discrepancies (Mnemosyne deletion, SRUM exfiltration, ShimCache/Amcache gap);...

Orchestration Warnings

- None recorded.

Open Questions

- No open questions recorded.
